 JavaScript

 Git

 Figma

 Material UI

 Bootstrap

 Firebase

 React

Summary

Dedicated and motivated Front end developer who strive to work on real projects. I've finished Front end course and I'm ready to work and improve my skills. I had been studying physics, algebra and geometry at the lyceum, so I have good analytical thinking and ability to learn quickly. My English language level is Strong Intermediate. You can check out my pet projects (there are links to github repositories 📁)

Experience

"Dog Breeds App" pet project

Tech stack: React, The Dog API, Material UI, Firebase-Firestore.

Description: This app is a platform for dog fanciers. You can search every dog breed and learn information about it. Also you can vote for photos of dogs and add them to liked, disliked and favourites. Voted photos are at profile page.

"ToDo App" pet project

Tech stack: React, Material UI, Firebase-Firestore.

Description: The app helps you to note your tasks. You can edit, delete and mark them as done.

"Calculator App" pet project

Tech stack: React, Redux.

Description: The app is a standart calculator. The functionality includes operations like addition, subtraction, multiplication, division. Also there are decimal point, deletion of digits and clearing of numbers.

"Text Editor" pet project

Tech stack: HTML, CSS, JavaScript.

Description: The app is a text editor where you can change font styles and sizes, text alignment. You can change background colors and images (even upload background image from device).
