Name Surname

Name of Company

Dear Name

My name is Maksym Syrotych. I am thrilled to be applying for the Frontend developer position at your company. After I've finished Frontend course I possess various skills and knowledge needed to execute duties associated with the role and therefore I believe that I would be a great fit to your team.

I've finished Frontend course in "Logos IT Academy" and I want to tell you about my experience. During my studies I've learned HTML, CSS/SCSS, JS, React and many other technologies and tools. Also I've got some pet projects. You can check out my GitHub repositories with my projects. In short there are "Dog Breeds App", "ToDo App", "Calculator App", and "Text Editor" projects.

It would be great if I could use my English at work. I've got Strong Intermediate English language level (B2 according to [learnenglish.britishcouncil.org](https://www.learnenglish.britishcouncil.org)). I'd like to know about the workflow at your company and possibility of engaging a mentor.

Thank you for your consideration and I look forward to hearing from you soon

Sincerely

Maksym Syrotych
